Generative AI

Assignment 3: Group Mini-Project Instructions

AI & Data Science Program, Jio Institute

---

1. Overview

Assignment 3 is a group mini-project. Form groups of 3 and implement the concepts learned in class in the form of a mini-project.

2. Key Dates

Milestone	Deadline	What is due
Idea submission	22 September 2026, EOD	Project idea (SEE Section 4)
Final submission	Date and time to be announced	GitHub code and 3-slide presentation (SEE Section 5)
Live demo	Date and time to be announced	8-minute live demo per team (SEE Section 6)

3. Project Scope

- The project should be on RAG with custom datasets and problem statements.
- It can optionally have agents.

4. Stage 1: Idea Submission (Due 22 September, EOD)

Each member of the group submits:

- **Group member names and IDs**
- **Problem statement:** The problem statement and why it is a good topic.
- **Proposed approach:** The techniques you will implement.
- **Tech stack:** The tech stack you will implement (LangChain, or LangChain + LangGraph if agentic).

Submit: PDF on Digiicampus by ALL members of the group

5. Stage 2: Final Submission (TBD)

Each member of the group submits:

- **Code:** GitHub link of the project repo
- **3-slide presentation:** Structured as below.

Slide	Content
1	Business impact

Slide	Content
2	Technical stack and GenAI solution architecture flow
3	Appendix (including the AI usage disclosure, see Section 8)

Submit: ZIP folder on Digiicampus by ALL members of the group

6. Live Demo

- Each team gets an 8-minute presentation and live demo, with about 3 to 4 minutes of Q&A.
- The date and time will be announced separately.

7. Tech Stack

- Use mainly the tech stack covered in class, with syntax as per class.
- If any additional syntax is used, be prepared to answer questions regarding its usage.

8. Use of AI Tools

- AI tools may be used only as a helper for the code.
- **If AI-generated code is detected, significant marks (30% flat – no discussions) will be deducted, so AI should be used very carefully.**
- A brief disclosure of AI usage is needed in the appendix.

9. Evaluation

The demo will be the main grading. The split is:

Component	Weight
Technical	80%
Presentation (including slide deck narrative)	20%

Note: Submissions not done on time by any member of the group on Digiicampus or editing the Github post submission deadline will result in penalties for the entire group (including but not limited to getting a 0 for the assignment).
